[LinkedIn](#)

I am a 22-year-old developer, mostly working on websites. Daily I work with PHP, Vue and the WordPress CMS, building themes using Roots/Sage. I also have experience integrating external services such as InPost. Apart from technical work, I collaborate closely with the marketing, sales and SEO departments, and I participate in meetings presenting our results and planning upcoming tasks.

I have spent my entire career at CODERHINO. I started as a trainee while still in technical school, where I began my internship and gained my first commercial experience building WordPress websites. Over time, I was given increasingly complex tasks, which I completed successfully and independently. Now I have over 3 years of experience, including both on-site and remote work.

Privately, I am a fan of F1, the NBA and Ekstraklasa, and I also enjoy reading books.

Skills

Front-end: Vue, React, TypeScript, Tailwind, Bootstrap, SCSS

Back-end: PHP, NodeJS, Express, Laravel, Python

Databases: MySQL, PostgreSQL

AI: Claude, Codex, ChatLab

CMS: Wordpress with Roots/Sage themes

Other tools: Git, Docker, Jira, Vite, DBeaver

Experience

CODERHINO / Mid Full-Stack Developer

NOVEMBER 2025 - CURRENTLY, REMOTE/KIELCE

My responsibilities are now broader — besides development, I've had the chance to supervise a few interns and delegate tasks to them in Jira. I work closely with TEB Edukacja's sales, marketing, and SEO departments, I'm an important voice at status meetings, and I oversee project work.

CODERHINO / Junior Front-End Developer

JUNE 2023 - NOVEMBER 2025, REMOTE/KIELCE

I kept combining work with school until finishing technical school in April 2024; from June 2024 I worked full-time, mainly on TEB Edukacja projects. During this time I grew a lot, especially in communication and teamwork.

CODERHINO / Intern Front-End Developer

MARCH 2023 - JUNE 2023, REMOTE

An internship I combined with school, during which I took part in my first commercial projects.

CODERHINO / Trainee Front-End Developer

MAY 2022, REMOTE

My first work placement in technical school. During this placement we built a browser layout synced with data from the League of Legends game client. On this project I was responsible for the backend in Node.js.

Testimonials

Przemysław Wiencko

Owner, CODERHINO

I have been collaborating with Mateusz for a total of 4 months so far. He is a diligent and persevering worker who won't rest until he finds a solution to a problem. Despite his age, he possesses excellent programming skills, particularly in the field of front-end development. He learns quickly, is communicative, and trustworthy.

Kacper Pawlik

Co-worker, CODERHINO

It was an absolute pleasure working with Mateusz at CODERHINO. Beyond being a reliable teammate, he acted as a fantastic mentor, providing invaluable guidance that significantly helped me level up my technical and professional skills. His knowledge and patience in explaining complex concepts made a real difference in my daily work.

Education

Programmer technician - Technical School number 1, Gliwice

2019 - 2024

At school I got to know the basics of PHP, JS and its frameworks and MySQL. I gained some experience with desktop apps in C# and with mobile apps in Java with Android Studio. In the meantime I have tried to extend my knowledge - from widely used MongoDB, Django or React Native to Kivy or Svelte, also I started my internship at CODERHINO. I finished school with 99% on my professional examination.
